

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of

**YANG et al**

Atty. Ref.: **2834-48**

Serial No. **Unknown**

Group:

National Phase of: **PCT/KR00/00829**

International Filing Date: **29 July 2000**

Filed: **January 29, 2002**

Examiner:

For: **SELECTIVELY LIGHT-ABSORPTIVE MATERIAL,  
COATING COMPOSITION CONTAINING THE SAME,  
AND FILTER MANUFACTURED USING THE COATING  
COMPOSITION FOR COLOR DISPLAYS**

**January 29, 2002**

Assistant Commissioner for Patents  
Washington, DC 20231

Sir:

**PRELIMINARY AMENDMENT**

Prior to calculation of the filing fee and in order to place the above identified application in better condition for examination, please amend as follows:

**IN THE SPECIFICATION**

Page 1, after the title insert the following:

-- This application is the US national phase of international application PCT/KR00/00829 filed July 2, 2000 which designated the U.S. --.

**IN THE CLAIMS**

Please substitute the following amended claims for corresponding claims previously presented. A copy of the amended claims showing current revisions is attached.

3. (Amended) The selectively light-absorptive material of claim 1, wherein two neighboring substituents among R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub>, R<sub>4</sub>, R<sub>5</sub>, R<sub>6</sub>, R<sub>7</sub> and R<sub>8</sub> are fused with each other to form 2 to 3 cyclic compounds having formula (2a) of claim 2, and in the cyclic

compound having formula (2a), at least one of R', R'', R''' and R'''' is an alkyl group of 2 to 6 carbon atoms or an alkoxy group of 2 to 6 carbon atoms.

4. (Amended) The selectively light-absorptive material of claim 1, wherein R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub>, R<sub>4</sub>, R<sub>5</sub>, R<sub>6</sub>, R<sub>7</sub> and R<sub>8</sub> are independently selected from an unsubstituted phenyl group, or a substituted phenyl group having 1 to 5 substituents selected from the group consisting of an alkyl group of 1 to 8 carbon atoms, an alkoxy group of 1 to 8 carbon atoms, a nitro group, halogen atoms, an alkylamine group of 1 to 8 carbon atoms, an aminoalkyl group of 1 to 8 carbon atoms, and a cyano group.

8. (Amended) A selectively light-absorptive coating composition comprising at least one of the selectively light-absorptive materials of claim 1, a plastic resin and an organic solvent.

13. (Amended) A selectively light-absorptive filter for a color display, comprising at least one of the selectively light-absorptive materials of claim 1, and a plastic resin.

**YANG et al**  
**Serial No. Unknown**

**REMARKS**

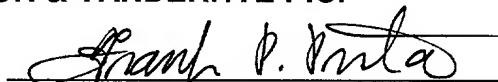

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "**Version with markings to show changes made.**"

The above amendments are made to place the claims in a more traditional format.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**

**VERSION WITH MARKINGS TO SHOW CHANGES MADE**

3. (Amended) The selectively light-absorptive material of claim 1 [or 2], wherein two neighboring substituents among R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub>, R<sub>4</sub>, R<sub>5</sub>, R<sub>6</sub>, R<sub>7</sub> and R<sub>8</sub> are fused with each other to form 2 to 3 cyclic compounds having formula (2a) of claim 2, and in the cyclic compound having formula (2a), at least one of R', R'', R''' and R'''' is an alkyl group of 2 to 6 carbon atoms or an alkoxy group of 2 to 6 carbon atoms.

4. (Amended) The selectively light-absorptive material of claim 1 [or 2], wherein R<sub>1</sub>, R<sub>2</sub>, R<sub>3</sub>, R<sub>4</sub>, R<sub>5</sub>, R<sub>6</sub>, R<sub>7</sub> and R<sub>8</sub> are independently selected from an unsubstituted phenyl group, or a substituted phenyl group having 1 to 5 substituents selected from the group consisting of an alkyl group of 1 to 8 carbon atoms, an alkoxy group of 1 to 8 carbon atoms, a nitro group, halogen atoms, an alkylamine group of 1 to 8 carbon atoms, an aminoalkyl group of 1 to 8 carbon atoms, and a cyano group.

8. (Amended) A selectively light-absorptive coating composition comprising at least one of the selectively light-absorptive materials of [claims 1 through 7] claim 1, a plastic resin and an organic solvent.

13. (Amended) A selectively light-absorptive filter for a color display, comprising at least one of the selectively light-absorptive materials of claim 1 [through 7], and a plastic resin.
